SUBCHAPTER V—ANIMAL HEALTH AND DISEASE RESEARCH

§ 3191. Purposes and findings relating to animal health and disease research

(a) Purposes

The purposes of this subchapter are to—

(1) promote the general welfare through the improved health and productivity of domestic livestock, poultry, aquatic animals, and other income-producing animals that are essential to the food supply of the United States and the welfare of producers and consumers of animal products;

(2) improve the health of horses;

(3) facilitate the effective treatment of, and, to the extent possible, prevent animal and poultry diseases in both domesticated and wild animals that, if not controlled, would be disastrous to the United States livestock and poultry

industries and endanger the food supply of the United States;

(4) improve methods for the control of organisms and residues in food products of animal origin that could endanger the human food supply;

(5) improve the housing and management of animals to improve the well-being of livestock production species;

(6) minimize livestock and poultry losses due to transportation and handling;

(7) protect human health through control of animal diseases transmissible to humans;

(8) improve methods of controlling the births of predators and other animals; and

(9) otherwise promote the general welfare through expanded programs of research and extension to improve animal health.

(b) Findings

Congress finds that—

(1) the total animal health and disease research and extension efforts of State colleges and universities and of the Federal Government would be more effective if there were close coordination between the efforts; and

(2) colleges and universities having accredited schools or colleges of veterinary medicine and State agricultural experiment stations that conduct animal health and disease research are especially vital in training research workers in animal health and related disciplines.

Funds appropriated under this section shall be used: (1) to meet expenses of conducting animal health and disease research, publishing and disseminating the results of such research, and contributing to the retirement of employees subject to the provisions of section 331 of this title; (2) for administrative planning and direction; and (3) to purchase equipment and supplies necessary for conducting such research.

(b) Apportionment of appropriated funds

Funds appropriated under subsection (a) of this section for any fiscal year shall be apportioned as follows:

(1) Four per centum shall be retained by the Department of Agriculture for administration, program assistance to the eligible institutions, and program coordination.

(2) Forty-eight per centum shall be distributed among the several States in the proportion that the value of and income to producers from domestic livestock, poultry, and commercial aquaculture species in each State bears to the total value of and income to producers from domestic livestock, poultry, and commercial aquaculture species in all the States. The Secretary shall determine the total value of and income from domestic livestock, poultry, and commercial aquaculture species in all the States and the proportionate value of and income from domestic livestock, poultry, and commercial aquaculture species for each State, based on the most current inventory of all cattle, sheep, swine, horses, poultry, and commercial aquaculture species published by the Department of Agriculture.

(3) Forty-eight per centum shall be distributed among the several States in the proportion that the animal health research capacity of the eligible institutions in each State bears to the total animal health research capacity in all the States. The Secretary shall determine the animal health research capacity of the eligible institutions.

(c) Development of program for each State

In each State with one or more accredited colleges of veterinary medicine, the deans of the accredited college or colleges and the director of the State agricultural experiment station shall develop a comprehensive animal health and disease research program for the State based on the animal health research capacity of each eligible institution in the State, which shall be submitted to the Secretary for approval and shall be used for the allocation of funds available to the State under this section.

When the amount available under this section for allotment to any State on the basis of domestic livestock, poultry, and commercial aquaculture species values and income exceeds the amount for which the eligible institution or institutions in the State are eligible on the basis of animal health research capacity, the excess may be used, at the discretion of the Secretary, for remodeling of facilities, construction of new facilities, or increase in staffing, proportionate to the need for added research capacity.

(e) Reallocation of funds to new colleges of veterinary medicine

Whenever a new college of veterinary medicine is established in a State and is accredited, the Secretary, after consultation with the dean of such college and the director of the State agricultural experiment station and, where applicable, deans of other accredited colleges in the State, shall provide for the reallocation of funds available to the State pursuant to subsection (b) of this section between the new college and

other eligible institutions in the State, based on the animal health research capacity of each eligible institution.
